Community Park Master Plan

The township has purchased a 126 acre parcel of land to develop into a new community park. The park will be located at the intersection of McKinley Road and 37th Street extension.

Pashek Associates has recently developed a master plan for the park. They worked with a study committee of 15 volunteers from the community to identify the types of the facilities required to meet the recreational and cultural needs of our community. The planned park complex will include shelters, walking trails, athletic fields, nature study areas and open green space.
